Drive-thru timer system

**Summit Drive-Thru Timer & Panorama Data Aggregator/Reporting Platform**

- Dual monitors display drive-thru performance metrics: one for timers, the other for dynamic rankings.
- Audible alerts via ceiling speakers accompany customizable visuals on the timer monitor.
- Reduce site visits with remote support, live loop activity monitoring, and real-time sensitivity adjustment
- Fair competition in drive-thrus of varying lengths through unique contact service speed measurement.
- Enhanced accuracy in y-lane drive-thrus with additional detection points at merges.
- Streamlined site visits with remote support
- Extensive customizations for automated reports and alerts, facilitating immediate actions.

Dynamic ranking system

The Summit Dynamic Ranking System is a live, real-time interactive performance tool that compares restaurants' operational efficiency with their peers across an entire brand, franchisee, region, or custom group.

- Real-time competitive ranking after each car
- Multiple options with ranking functions
- In-depth performance reporting
- Remote reporting accessibility

Panorama reporting

Summit Drive-Thru Timer & Panorama Data Aggregator/Reporting Platform

- Dual monitors display drive-thru performance metrics: one for timers, the other for dynamic rankings.
- Audible alerts via ceiling speakers accompany customizable visuals on the timer monitor.
- Remote support enables live loop activity monitoring and real-time sensitivity adjustment, reducing site visits.
- Fair competition in drive-thrus of varying lengths through unique contact service speed measurement.
- Enhanced accuracy in y-lane drive-thrus with additional detection points at merges.
- Streamlined site visits with remote support, leading to more first-visit resolutions.
- Extensive customizations for automated reports and alerts, facilitating immediate actions.

Drive-thru headset system
(Including speaker & microphone)

Par Drive-Thru G5

- Modular serviceability allows the crew to replace carriers/pods in seconds. Replace only what is needed & the headset never has to leave the shop.
- Multi-use charging station allows you to charge & store headsets in one location without removing the battery to charge.
- 'Fuel gauge' on batteries easily shows charge status
- The accelerometer eliminates the need for an on/off button. After 5 minutes of no motion, the headset goes to sleep and is 'instant on' upon new movement.
- Enjoy a worry-free upgrade with a 24-month warranty on the base station, charging station, headset carriers, & control pods.
